my own project deployment)

ABOUT ME

I'm dedicated junior backend developer with a strong interest in building reliable, scalable, and efficient systems. I enjoy working with server-side technologies, designing APIs, managing databases, and ensuring smooth communication between the frontend and backend.

where I focused on structuring the backend, handling data flow, and supporting features like filtering, comparison, and authentication. These experiences helped me strengthen my skills in API development, database management, and application logic.

SKILLS

Front-End : HTML 5- CSS 3- JavaScript- React.js- Bootstrap 5, Tailwind, Firebase

Back-End: Python-Python OPPS-Django-REST APIs-Post Man-Python Numpy-PostgreSQL

Data Base: My-sql-PgAdmin

Version Control: Git-GitHub

EDUCTION

SSLC & HSC: Dr.V.G.N.Matric Higher Secondary School

BE (computer science and engineering): **CGPA: 8.5**

GRT INSTITUTION OF ENGINEERING AND TECHNOLOGY **pass out in may-2025**

SOFT SKILLS

Problem Solving-Leader Ship-Learning-Lessoning- Analytical Thinking- Creativity- Time Management- Attention To Detail Adaptability- Team Player- Teaching

ONLINE COURSES & CERTIFICATIONS

Python Full Stack Developer :

I have completed the course at Besant Technologies , Vijaya Nagar, Velachery, Chennai- 600042 - Sep 2025

EXPERIENCE

I have 4 month experience in VSOLV ENGINEERING INDIA PRIVATE LIMITED and 2 month experience in project KVB (karur vysya bank) project, And i handle the insurance and insurance commission file in the project and also have experience in HRMS.

PROJECT

Maverick-flix

A creative streaming service focusing on independent films ("maverick" = independent, bold).
Maverick-Flix might be:

- A movie & TV show streaming platform clone (like Netflix UI).
- Built to showcase your skills in web development (HTML, CSS, JavaScript, Bootstrap).
- Could include features like:
    - Movie cards with posters, trailers, and descriptions.
    - Categories (Action, Drama, Comedy, etc.).
    - A carousel slider for trending content.
    - User authentication (login, signup).

Portfolio-Website

A created portfolio website for my self.
Portfolio Website might be:

- A portfolio = your personal brand + your work + your story, all in one place.
- Built to showcase your skills in web development (HTML, CSS, JavaScript, Tailwind).
- Could include features like:
    - Project cards with Live demo and Git repo.
    - Contact using email service

Auto Question Paper Generator

Generate randomized question papers by difficulty, topic, and type. Includes PDF export & teacher dashboard.

- Difficulty-weighted randomization algorithm
- CSV import of question bank
- Built the application with tools (HTML, CSS, PYTHON, DJANGO, SQL).

KVB- karur vysya bank

Karur Vysya Bank is one of the leading commercial banks in India. KVB offers a wide range of services from loans, accounts & deposits etc.
I handle the insurance and insurance commission in the project and i have 2 month experience in this project.

- Python , django, Mysql and postman
- Using the django api to call the data from the DB
- In the project also use raw query and postgresql
- Built the application with tools (HTML, PYTHON, DJANGO, MYSQL, POSTMAN, PGADMIN).

INTERNSHIP

TechCore:

I done my intership in techcore in filed of the back end (python)

Pyroferos:

i done my intership in pyroferos in the roll of software tester
